**Flask, PolyPropylene, 1000 ml**  
**Item Description**  
Nalgene® volumetric flask  
1,000 mL volume, accuracy: 0.60 mL,  
translucent polypropylene

**Stock Comment**  
Senior use only

## Use SciList to...

- Keep records of all your equipment, consumables and chemicals in one central system
- Be able to locate any item quickly
- Be able to print stock lists by location, or by category and/or by discipline
- Allow staff to browse for equipment without being able to alter the records
- Have prep gear recorded, but not viewable by general staff
- Streamline your stocktakes: produce reorder lists and purchase orders by supplier.
- Manage purchase orders, and maintain purchase histories

## Features of SciList ...

- Record items with locations and sub-locations e.g. Rm G5, Shelf 7
- Link items to one or more Disciplines e.g. Biology, Chemistry
- Link items to one or more Categories e.g. Electrical, Aquarium
- Keyword searching for items
- Display images of items
- Print stock lists by location, category, and/or discipline
- Record supplier details with email and web links
- Monitor outstanding orders, mark off received items, and keep a purchase history
- Simple to install and operate
- Flat menu structures make it easy to navigate
- All reports offer Acrobat Reader, HTML, or text output options
- Secure password protection and levels of access
- Network compatible

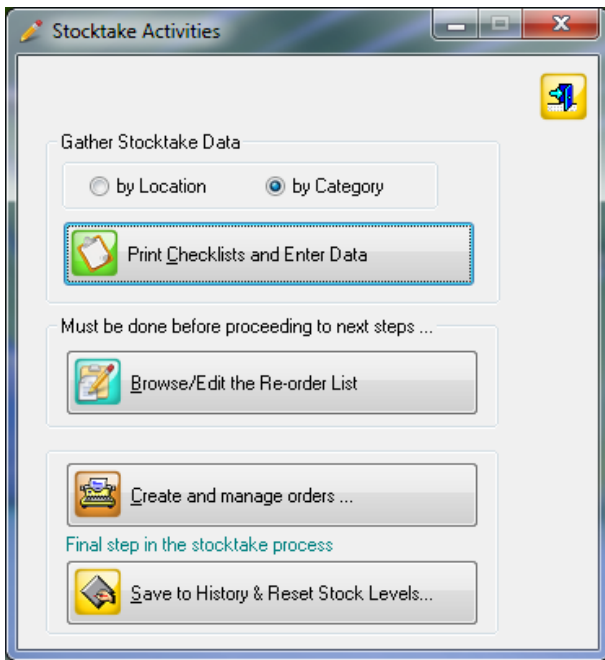

From the makers of

**BookIt, JobCard  
& SportsTrak**

20 years in schools

Import existing data from  
a spreadsheet or similar  
format

SciList takes you through full or partial stocktakes, creates re-order lists, writes orders, and maintains purchase histories.

**Stock Items by Location** Physics Store

Location	Item	Quantity	Unit
25	Battery charger 6-12-24 v	1	<input type="text"/>
25	Electrical kit, Clippit	3	<input type="text"/> box
25	Electronics [kit]	9	<input type="text"/>
25	Screen, ground perspex	9	<input type="text"/>
25	Multimeter, digital	10	<input type="text"/>
04	Lever and fulcrum, with weights	1	<input type="text"/>
bench	Bar, soft iron	1	<input type="text"/>
display	Power supply, 0-12v AC/DC	6	<input type="text"/>

floor	Telescope, astronomical, spare parts	1	<input type="text"/> container
floor	Weight, hexagonal, iron, 2kg	3	<input type="text"/>
floor	Weight, hexagonal, iron, 1kg	8	<input type="text"/>
floor	Weight, slotted, iron, set of ten, total 10kg	1	<input type="text"/>

### Who is this software for?

This software is directed at school laboratory technicians who like to be organised and efficient and get frustrated at the limitations of spreadsheets or similar methods of working with stock records.

SciList is a database with a user friendly interface that coordinates the record keeping, stocktaking, and ordering processes. It greatly helps continuity within the department when staff change because everything is on a single documented system.

Email: young.keryn.l@edumail.vic.gov.au

Item	Product Code	Quantity	Cost
Pen, Black	PE6646	3 Box	18.90
Marking pen, whiteboard, black		24	28.80
Marking pen, whiteboard, red		24	28.80
Marking pen, whiteboard, blue		20	24.00
Marking pen, whiteboard, green		12	14.40
Marking pen, whiteboard, orange		6	7.20
Marking pen, whiteboard, brown		3	3.60
Square Acrylic		4	17.80
Total \$			143.60

### Try it with no obligation or commitment.

Download the setup program and install SciList from <http://www.carobcom.com>

This installs in demonstration mode, with sample data.

To get the software operating fully (on approval) email or fax a school order to us.
